

5. Summary

The assessments result is that the Panorama Antennas TRNM Series meets the requirements of the fire safety standards EN 45545-2 hazard levels HL 1 to HL 3 under consideration of the installation conditions in railway vehicles.

For regular (intended) operation the required level of personal safety is ensured.

The assessment is based on documents provided by the costumer (see clause 6).

This inspection report was written under the specified accreditation.
