

order number: B00080A0123

black strain relief for BNC EasyGrip straight plug crimp J01002A0080

Technical Attributes	
Cable group; cable	G41 (0.6/2.8-4.7)
Remarks	black strain relief for BNC EasyGrip straight plug crimp J01002A0080
Colour	black RAL 9005

Product description

Telegärtner has now developed the BNC EasyGrip HD³ connector series which specifically addresses the special requirements of HDTV signal transmission in professional applications such as in TV studios, outdoor broadcasting vehicles, and large live events. The BNC EasyGrip HD³ series conforms to the IEC Standard (IEC 61 169-8), and as such is fully compatible with all standard BNC 75 Ohm connectors. The series has the following distinguishing features:

- High Definition: Excellent transmission characteristics up to 4,5 GHz (Return Loss values of

Performance Characteristics

- Developed specifically for HDTV signal transmission in professional applications
- High packing-density and simple assembly
- Crush-Proof: the robust die-cast housing provides complete protection against damage caused by mechanical stress along the whole length of the connector
- Large „EasyGrip“ area for reliable and fast connection
- Reliable signal transmission up to 4.5 GHz
