TP5384SDK

High Precision Smart GNSS Antenna with PPP-RTK, and Precise Heading

The Calian TruPrecision SDK is a Windows application which provides an autonomous connection to stream corrections and decryption keys to the TW5384 Smart GNSS Antenna via a USP serial bridge, which also provides a Virtual COM Port to allow customers to connect their existing applications to the Calian Smart GNSS Antenna "corrected" position data output. The position data may be either NMEA or UBX formatted messages.
